

**Topic:** One-sided limits**Question:** Find the left-hand limit.

$$\lim_{x \rightarrow 2^-} \frac{|x - 2|}{x - 2}$$

**Answer choices:**A       $-1$ B       $1$ C       $-2$ D       $2$ 

**Solution: A**

If we try substitution to evaluate the limit, we get the undefined value  $0/0$ . Instead, let's try substituting a value to the left of  $x = 2$  that's very close to  $x = 2$ , like  $x = 1.9999$ .

$$\frac{|1.9999 - 2|}{1.9999 - 2}$$

$$\frac{|-0.0001|}{-0.0001}$$

$$\frac{0.0001}{-0.0001}$$

$$-1$$

As we approach  $x = 2$  from the left, the function is a constant  $-1$  (the numerator is always positive and the denominator is always negative). The graph of the function confirms this value for the left-hand limit.

**Topic:** One-sided limits**Question:** Find the right-hand limit.

$$\lim_{x \rightarrow 2^+} \frac{|x - 2|}{x - 2}$$

**Answer choices:**A       $-1$ B       $1$ C       $-2$ D       $2$ 

**Solution: B**

If we try substitution to evaluate the limit, we get the undefined value  $0/0$ . Instead, let's try substituting a value to the right of  $x = 2$  that's very close to  $x = 2$ , like  $x = 2.0001$ .

$$\frac{|2.0001 - 2|}{2.0001 - 2}$$

$$\frac{|0.0001|}{0.0001}$$

$$\frac{0.0001}{0.0001}$$

$$1$$

As we approach  $x = 2$  from the right, the function is a constant 1 (the numerator is always positive and the denominator is always positive). The graph of the function confirms this value for the right-hand limit.

**Topic:** One-sided limits**Question:** Find the limit.

$$\lim_{x \rightarrow 2} \frac{|x - 2|}{x - 2}$$

**Answer choices:**

- A      $-1$
- B      $1$
- C      $-2$
- D     Does not exist (DNE)

**Solution: D**

We can see the left-hand limit of the function at  $x = 2$  if we try substituting  $x = 1.9999$ .

$$\frac{|1.9999 - 2|}{1.9999 - 2}$$

$$\frac{|-0.0001|}{-0.0001}$$

$$\frac{0.0001}{-0.0001}$$

$$-1$$

We can see the right-hand limit of the function at  $x = 2$  if we try substituting  $x = 2.0001$ .

$$\frac{|2.0001 - 2|}{2.0001 - 2}$$

$$\frac{|0.0001|}{0.0001}$$

$$\frac{0.0001}{0.0001}$$

$$1$$

The graph of the function confirms these one-sided limits.

Because the one-sided limits aren't equivalent, the general limit of the function doesn't exist at  $x = 2$ .
